Objective

B.Tech Computer Science graduate with expertise in Python, Django, REST APIs, SQL, and Data Analysis (Pandas, NumPy, Matplotlib), experienced in building full-stack web applications and cloud-based solutions. Passionate about Software/Python Developer, Data Analytics, and solving real-world problems using DSA, OOP, and scalable system design.

Technical Skills

Programming Languages: Python

Frontend: HTML5 | CSS3 | JavaScript | React

Frameworks: Django | Rest APIs

Data Analysis: Pandas | NumPy | Matplotlib | Excel

Databases: MySQL | SQLite

Core Cs: Data Structure Algorithms | OOPs | DBMS | System Design | CI / CD

Cloud: Cloud Computing (NPTEL Certified) | AWS(EC2)

Emerging Tech: AI / ML | Generative AI | RAG | LLMs | Prompt Engineering(Vibe Coding) | Antigravity | Git/GitHub

Training & Internships

Python Full Stack Training, Pentagon Space

May 2024 – Dec 2024

- Completed 300+ hour full-stack program in Python, Django, JavaScript, and REST APIs; used NumPy and Pandas to clean, analyze, and visualize 5+ datasets in Matplotlib and Excel.

AWS Cloud Intern, BrainOvision Solutions Pvt. Ltd

Jan 2023 – Apr 2023

- Gained knowledge on the basics of cloud infrastructure, deployment, and resource management through hands-on practice.

J.P. Morgan Chase and Co. Software Engineering Virtual Internship via Forage

- Gained hands-on experience with stock price data, data visualization, including an open-source contribution.

Projects

CareConnect: Hospital Appointment Booking & Scheduling System

bookingsys.netlify.app/

- Full-stack booking platform built with Python, Django (REST Framework), SQLite, and JavaScript.
- Implemented 3+ REST API endpoints for appointment scheduling, supporting 50+ patients and 10+ providers.
- Built a custom scheduling engine that cut manual conflicts by 90% via real-time availability checks.

PyPractice: Wasm-Powered Python Compiler

practicecompiler.netlify.app/

- Created a serverless, browser-based Python compiler and complexity analyzer using Prompt Engineering (Vibe Coding) at Antigravity.
- Built client-side Python execution in WebAssembly (Pyodide) with real-time memory and Big-O spectrum tracking.
- Designed a glassmorphic React workspace featuring dynamic console inputs and debounced auto-saving.

Skills: React | Vite | WebAssembly | Python AST | Vibe Coding

Education

Bachelor of Technology in Computer Science Engineering. | CGPA: 7.4

Oct 2020 – May 2024

Annamacharya Institute of Technology and Sciences, Kadapa

Intermediate. | CGPA: 8.6

Sept 2018 – Mar 2020

Narayana Junior College

Secondary Education. | CGPA: 8.8

Jan 2017 – Feb 2018

Sarada High School

Certificates

Python for Data Science, IBM Cognitive Class | Flipkart | HackerRank | Simplilearn | Cloud Computing

CONTINUOUS LEARNING & SOFT SKILLS

Consistently practicing Data Structures & Algorithms, exploring advanced Python concepts, and building communication skills, while applying leadership and time management skills gained through academic project work.
